

**Langley Research Center
MANAGEMENT MANUAL
TRANSMITTAL SHEET**

**LAPG 4520.1
June 23, 1999**

CANCELLATION NOTICE

Langley Procedures and Guidelines (LAPG) 4520.1, "Langley Research Center Receipt Inspection and Quality Assurance Laboratory (RIQAL)," dated February 1997, is canceled. The overarching NASA Management Instruction 5320.7, "Basic Policy for Mechanical Parts Control," was canceled June 8, 1998. The LAPG is significantly out of date relative to the "Zero Defect Policy" which ceased in 1998, the contractor ISO status, the sampling plan, and the "applicable documents."

This LAPG serves as a general introduction to the functions performed by the Laboratory. Rather than establish an LAPG to inform the Center of the Laboratory's activities, the Office of Safety, Environment and Mission Assurance is developing a website which will disseminate information on the kind of tests the Laboratory performs and the equipment utilized.
